

Do you have a job?
Do you make at least minimum wage?
WE WANT YOU!

The Arc Lane County is publishing a coffee table book to represent the humanity and dreams of people with intellectual and developmental disabilities. It will feature individuals across the lifespan with illustrations of their employment dreams. These dreams go beyond being a janitor or wiping tables, but goals that stretch the limit of traditional job categories. Employers will be asked to display these books in their waiting rooms and lobbies. The Arc is seeking potential models with I/DD and their employers to participate in the project. Each participant and their employer will receive a copy of the book.
